AKEMI®

AKEPUR 250 HIGH TACK

2C-PUR adhesive for substructures

Pegamento de 2 componentes a base de PU para subestructuras

Adesivo PUR bi-componente per sottostrutture

Properties:

- fast initial tack and functional hardness
- high bonding strength on metal, ABS, PVC, GRP, ceramics, natural and artificial stone
- low shrinkage
- good resistance to solvents
- does not foam
- temperature resistant -30 up to 120°C
- easy dosing and mixing due to cartridge system

Area of application:

Bonding of substructures on kitchen counter tops as well as vertical and horizontal bondings in non visible areas.

Propiedades:

- rápida adhesión inicial y estabilidad funcional
- alta fuerza adhesiva sobre metales, ABS, PVC, PRFV, cerámica, piedras naturales y artificiales
- poca contracción
- buena resistencia a los disolventes
- no espumoso
- resistencia a las temperaturas -30 hasta 120°C
- dosificación y mezcla fácil con el sistema de cartuchos

Campo de aplicación:

Para pegar subestructuras de encimeras en cocinas así como en zonas no visibles verticales y horizontales.

Caratteristiche:

- adesione iniziale rapida e stabilità funzionale
- elevata adesione sui metalli, ABS, PVC, GFRP, ceramica, pietre naturali e artificiali
- a basso ritiro
- buona resistenza ai solventi
- non schiumogeno
- resistenza termica da -30 a 120°C
- facile da dosare e miscelare grazie al sistema a cartuccia

Campo di applicazione:

Incollaggio di sottostrutture dei piani da lavoro di cucine e incollaggi verticali e orizzontali su aree non a vista.

Comparison of various 2C-adhesive in cartridges

Distintos pegamentos de 2 componentes en cartuchos en comparación

Diversi adesivi bi-componente in cartuccia a confronto
