#### **SECTION 4: First aid measures**

#### · 4.1 Description of first aid measures

General information:	Take affected persons out into the fresh air.
	Position and transport stably in side position.
	Immediately remove any clothing soiled by the product.
	Symptoms of poisoning may even occur after several hours; therefore medical
	observation for at least 48 hours after the accident.
<ul> <li>After inhalation:</li> </ul>	Supply fresh air and to be sure call for a doctor.
	In case of unconsciousness place patient stably in side position for
	transportation.
<ul> <li>After skin contact:</li> </ul>	If skin irritation continues, consult a doctor.
	Immediately wash with water and soap and rinse thoroughly.
<ul> <li>After eye contact:</li> </ul>	Rinse opened eye for several minutes under running water. Then consult a
	doctor.
<ul> <li>After swallowing:</li> </ul>	Call for a doctor immediately.
	Drink plenty of water and provide fresh air. Call for a doctor immediately.

	(Contd. of page 3)
· 4.2 Most important symptoms	
and effects, both acute and	
delayed	Breathing difficulty
	Headache
	Dizziness
	Coughing
<ul> <li>Information for doctor:</li> </ul>	The symptoms of phenol based poisoning appearances are white coloured mouth scabs, shock condition, insensibility, bradycardia and renal dysfunction and damage of renal tissue. Appropriate therapy measures: Administration of an adequate volume of liquid, gastrolavage in application of carbo medicinalis, sodium sulphate with plenty of water, infusion of glucose solution (5%); maesures against state of shock, hemodialysis. Nonylphenol based exposition: causes corrosive burns, damages respiratory tract, eyes, skin and digestive system up to complete tissue destruction. Temporary dysfunctions such as dizziness, headache, nausea and diarrhea may occur. Can cause health disturbances like dermal bleaching, renal and hepatic damage. Amines: Inhalation, swallowing or dermal contact may cause health damages. Cause burns, harm respiratory tract, eyes, skin, and digestion system in worst case up to complete destruction. Intermediate interferences such as headache, nausea, cough, dyspnea may occur. May cause allergies. Sensitized users may
	react towards very low amine concentrations and should avoid any further
	contact with this group of chemicals.
• <u>Hazards</u>	Danger of impaired breathing.
• 4.3 Indication of any immediate	
medical attention and special	
treatment needed	If swallowed, gastric irrigation with added, activated carbon.
SECTION 5: Firefighting measur	res
<ul> <li>5.1 Extinguishing media</li> </ul>	
<ul> <li>Suitable extinguishing agents:</li> </ul>	Use fire extinguishing methods suitable to surrounding conditions.
<ul> <li><u>5.2 Special hazards arising from</u></li> </ul>	
the substance or mixture	Formation of toxic gases is possible during heating or in case of fire. In case of fire, the following can be released: Carbon monoxide (CO) Nitrogen oxides (NOx)
	Under certain fire conditions, traces of other toxic gases cannot be excluded.
• 5.3 Advice for firefighters	
Protective equipment:	Wear fully protective suit.
	Wear self-contained respiratory protective device.
	Do not inhale explosion gases or combustion gases.
<ul> <li>Additional information</li> </ul>	Mount respiratory protective device. Collect contaminated fire fighting water separately. It must not enter the sewage
	system.
	Dispose of fire debris and contaminated fire fighting water in accordance with
	official regulations.
SECTION 6: Accidental release	measures
<ul> <li><u>6.1 Personal precautions</u>, protective equipment and</li> </ul>	

protective equipment and	
emergency procedures	Ensure adequate ventilation
	Use respiratory protective device against the effects of fumes/dust/aerosol.
	Wear protective equipment. Keep unprotected persons away.
· 6.2 Environmental precautions:	Do not allow to penetrate the ground/soil.

<ul> <li>Personal protection</li> <li>General protection</li> </ul>		
measures:	Do not eat, drink, smoke or sniff while working.	
modouroon	Use skin protection cream for skin protection.	
	Clean skin thoroughly immediately after handling the product.	
	Keep away from foodstuffs, beverages and feed.	
	Immediately remove all soiled and contaminated clothing Wash hands before breaks and at the end of work.	
	Do not inhale gases / fumes / aerosols.	
	Avoid contact with the eyes and skin.	
<ul> <li>Respiratory prote</li> </ul>		
	Filter A/P2	
	In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.	
<ul> <li>Protection of han</li> </ul>		
	After use of gloves apply skin-cleaning agents and skin cosmetics.	
	Skin protection agent recommendation for preventive skin shelter in application	
	and combination of protective gloves: STOKO EMULSION (http://www.stoko.com)	
	Shore Employed (http://www.stoke.com) Skin protection recommendation for skin cleaning after product handling:	
	Kresto Classic (http://debstoko.com)	
	Skin protection agent recommendation for skin aftercare:	
	STOKO VITAN (http://www.stoko.com)	
	The protection gloves to be used have to comply with the specifications of the directive 89/686/EC and the directive derived decree EN374, respectively, e.g.	
	the above listed protection glove type. The mentioned permeation times data	
	were generated and verified with material samples of the recommended	
	protection glove type in the scope of laboratory anylyses of the company KCL	
	GmbH in compliance with EN374. This recommendation refers exclusively to the material safety data sheet	
	referenced product delivered by Akemi and the indicated field of application. In	
	case of product dilution or in case of mixture with different substances or	
	chemicals, and in condition of EN374 deviation the producer of CE-approved	
	protection gloves must be contacted for detailed information (e.g., KCL GmbH,	
	Germany, 36124 Eichenzell, internet: http://www.kcl.de).	
	Protective gloves	
	The live gives	
	The glove material has to be impermeable and resistant to the	
	product/ the substance/ the preparation.	
	Due to missing tests no recommendation to the glove material can be	
	given for the product/ the preparation/ the chemical mixture.	
	Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation	
<ul> <li>Material of gloves</li> </ul>		
	The selection of the suitable gloves does not only depend on the material, but	
	also on further marks of quality and varies from manufacturer to manufacturer.	
	As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked

	Chloroprene rubber, CR
<ul> <li>Not suitable are gloves made of</li> </ul>	Camapren (KCL, Art_No. 720, 722, 726)
the following materials:	Natural rubber, NR
	Fluorocarbon rubber (Viton)
Eye protection:	
	tightly sealed goggles
<ul> <li>Body protection:</li> </ul>	Protective work clothing
SECTION 9: Physical and chemic	al properties
<ul> <li>9.1 Information on basic physica</li> </ul>	l and chemical properties
<u>General Information</u>	
<ul> <li><u>Appearance:</u> Form:</li> </ul>	Fluid
Colour:	Yellow
· Odour:	Characteristic
· Change in condition	
Melting point/freezing point:	Undetermined.
Initial boiling point and boiling ran	ge: 205 °C
· Flash point:	101 °C
<ul> <li>Ignition temperature:</li> </ul>	380 °C
Decomposition temperature:	> 250 °C
· Auto-ignition temperature:	Product is not selfigniting.
Explosive properties:	Product does not present an explosion hazard.
Explosion limits:	
Lower:	1.3 Vol %

13 Vol %

0.1 hPa

1.06 g/cm<sup>3</sup>

Not miscible or difficult to mix.
